SUMMARY

Motivated and customer-focused Computer Science graduate with strong communication, problem-solving, and analytical skills. Experienced in handling real-time user interactions through multiplayer and interactive application development. Quick learner with the ability to adapt to new environments, resolve issues efficiently, and provide quality customer support. Comfortable working in team-oriented and fast-paced environments.

EDUCATION

Bachelor of Technology (B.Tech) – Computer Science & Engineering

National Institute of Technology, Andhra Pradesh

08/2018 - 05/2022

MPC (Intermediate)

Sri Chaitanya Junior College, Vijayawada

06/2016 - 04/2018

Class X, Secondary Education

Sri Chaitanya EM High School, Jaggayapeta

06/2015 - 04/2016

SKILLS

Customer Support & Issue Resolution, Communication & Interpersonal Skills, Problem Solving & Analytical Thinking

React.js, JavaScript, HTML, CSS

Python, C/C++, SQL, Deep Learning

MongoDB, Linux, DSA

PROJECTS

Image Context Captioning System

- Developed an image captioning application using deep learning sequence models and TensorFlow to automatically generate descriptive captions for input images.
 - Built a user-facing interface (via Streamlit) to allow users to upload images and receive model-generated captions in real time.
- Real Time Face Mask Detection

Real Time Face Mask Detection

- Built a real-time face-mask detection system using deep learning—leveraged TensorFlow and MediaPipe face detection to identify masked vs unmasked faces in live video streams.
- Developed a video-frame processing pipeline with OpenCV for real-time capture, passing detected face regions into the mask-detection model for inference and overlay visualization.

CERTIFICATIONS

The Joy of Computing using Python

NPTEL

STRENGTHS

- | | |
|---|---|
| Quick learner with strong adaptability | Good listening and communication skills |
| Ability to work under pressure and meet deadlines | Strong attention to detail and discipline |
